

Durable Waterproof Distribution Box

Summary of Content

Waterproof distribution boxes with IP65–IP66 ratings, made from durable ABS or PC plastics, provide reliable protection for electrical systems in harsh environments.

Key Features

Protection and Durability: These distribution boxes are designed to withstand dust, rain, UV exposure, and mechanical stress. Most models meet IP65 or IP66 standards, ensuring complete protection against water jets and dust ingress, and comply with IEC60529 and related international standards for electrical safety and flammability .

Materials: High-quality ABS and polycarbonate (PC) plastics are commonly used, offering excellent mechanical strength, corrosion resistance, and UV stability for outdoor installations . Some models feature transparent PC doors for easy inspection without opening the enclosure .

Configurations and Sizes: Distribution boxes are available in single, double, or triple layers, with 4 to 39 ways (positions) to accommodate various circuit requirements. Compact AT Series boxes are ideal for tight spaces, while HT Series or larger models provide extra internal room for complex wiring and DIN rail mounting .

DIN Rail and Accessories: Many boxes come with DIN rails, neutral and earth busbars, and knock-out entries for cable glands, allowing flexible installation of MCBs, RCDs, or RCBOs. Accessories like labels, bars, and pre-assembled solutions are often available for convenience .

Applications: These boxes are suitable for industrial, commercial, photovoltaic, EV charging, lighting, pumps, HVAC, and automation systems, both indoors and outdoors .

Reliability: Compression gaskets maintain sealing even after repeated openings, ensuring long-term performance. The enclosures are lightweight yet robust, making them suitable for field installations .

Choosing the Right Box
