

East African Cable Tray Specifications

Summary of Content

Cable trays in East Africa are manufactured to meet international standards, available in various materials and load capacities for industrial, commercial, and power distribution applications.

Materials and Types

Cable trays in East Africa are commonly made from galvanized steel, stainless steel, aluminum, and PVC/GRP plastics depending on the application and environmental conditions . They are available in several types:

- Ladder trays: Suitable for heavy-duty cables and long spans.
- Perforated trays: Allow ventilation and are ideal for medium-duty applications.
- Solid-bottom trays: Provide full protection for sensitive cables.
- Wire mesh trays: Lightweight and flexible, often used for data and telecom cabling .

Standards and Compliance

Manufacturers such as Unitrunk and Legrand produce cable trays certified to British, European, and International Standards, including IEC 61537, which specifies requirements for cable trays, ladders, supports, and accessories to ensure safety and reliability . CE marking is often used to indicate compliance with European directives, and third-party certifications like UL, NEMA, and IMQ may apply for specific products .
