

Electrical worker with distribution box

Overview

Electrical Distribution Workers, also known as Linemen, primarily work for utility companies, local government agencies, and contractors across various industries. Their primary role involves the installation, maintenance, and repair of electrical distribution systems. A distribution box is a low-voltage electrical enclosure that receives incoming power and distributes it safely to multiple outgoing circuits through protective and switching devices such as MCBs, RCDs, RCBOs, fuses, isolators, busbars, neutral bars, earth bars, and surge protective devices. The distribution box (DB box) helps safely and efficiently distribute electrical power. What does an electrical distribution worker do?

As an electrical distribution worker, you will. These Distribution Boxes enable decentralized installation of the electronics close to the load. SMART DISTRIBUTION BOXES FOR FLEXIBLE BUILDINGS.
