

Equipment Assembly Price of Distribution Boxes

Summary of Content

Distribution box assembly equipment typically ranges from \$3.75 per unit for basic IP66 enclosures to several hundred dollars for custom or high-spec industrial units.

Price Range and Factors

- **Basic Units:** Standard MCB distribution boxes or assembly boxes for residential or light commercial use can start at approximately \$3.75 per unit for wholesale or bulk orders, particularly for IP66-rated enclosures made of steel or plastic .
- **Industrial or Custom Units:** Prices increase significantly for customized metal distribution boxes, modular cabinets, or units with high ingress protection (IP66-IP69K), specialized busbar fitments, or heavy-duty connectors. These can range from \$50 to several hundred dollars per unit, depending on specifications, materials, and production volume .
- **Material Influence:** Steel, stainless steel, and aluminum enclosures are more expensive than plastic (ABS or polycarbonate) due to higher fabrication costs and mechanical strength . Powder-coated steel or fireproof plastic options also affect pricing .
- **Design and Features:** Multiple compartments, removable sub-panels, DIN-rail assemblies, and plug-in MCB compatibility increase costs. Custom branding, logo embossing, and cable entry modifications also add to the price .
- **IP Rating and Environmental Protection:** Achieving higher IP ratings (IP66, IP67, IP69K) requires better seals, precision machining, and testing, which increases both material and labor costs .
