

Estonian Spectrometer Manufacturer

Summary of Content

Key spectrometer manufacturers in Estonia include Interspectrum, Monospektra, and Laboid International, offering a range of FTIR, NIR, and compact spectrometers for research, industrial, and educational applications.

Leading Manufacturers

1. Interspectrum Interspectrum specializes in compact and versatile FTIR and FTNIR spectrometers, including models like the Interspec 200-X, 311, 650-X, and 300-X series. Their instruments are designed for high performance in a compact size, suitable for laboratory, educational, and portable applications. They also offer modular systems for teaching spectroscopy in universities and science labs, as well as accessories for diffuse reflectance and ATR measurements . 2. Monospektra Monospektra provides a broad range of scientific equipment and industrial solutions, including compact spectrometers, monochromators, spectroscopic systems, and optical spectroscopy tools. They cater to applications in biomedical research, confocal Raman and fluorescence spectroscopy, light sheet microscopy, and optical 3D surface measurement. Monospektra works with global manufacturers to supply both entry-level and high-end automated analytical systems . 3. Laboid International Laboid International is a prominent spectrophotometer and spectrometer supplier in Estonia, offering precision instruments for research and industrial use. They emphasize quality, durability, and performance, maintaining extensive inventory for prompt delivery. Laboid serves both domestic and international markets, providing reliable spectrometers for laboratory and scientific applications .
