

Estonian manufacturer specializing in custom-made explosion-proof electrical distribution boxes

Summary of Content

Currently, there are no widely documented Estonian manufacturers of explosion-proof electrical distribution boxes; most suppliers are international, though local distributors may provide access to certified products.

Overview of Explosion-Proof Distribution Boxes

Explosion-proof electrical distribution boxes are designed for hazardous areas (Zones 1 and 2) and comply with ATEX and IECEx standards. They are used in industries such as oil & gas, petrochemical, and pharmaceuticals to safely distribute power and control signals in environments with flammable gases or dust. Key features include:

- Robust enclosures made from stainless steel (AISI 304L or 316L) or corrosion-resistant materials
- Customizable control stations with push buttons, motor starters, and terminal blocks
- High IP ratings for protection against dust and water ingress
- Compliance with international certifications for hazardous areas

International Manufacturers

Several global companies specialize in explosion-proof distribution boxes and may supply to Estonia:
