

Explosion-proof distribution box for factory use in Mozambique

Summary of Content

Explosion-proof distribution boxes for industrial use in Mozambique should be ATEX or IECEx certified, designed for hazardous zones, and capable of withstanding extreme environmental conditions.

Key Features and Applications

Explosion-proof distribution boxes are engineered to contain internal explosions and prevent ignition of surrounding explosive atmospheres, making them essential for factories handling flammable gases, dust, or chemicals . They are commonly used in chemical plants, oil refineries, offshore platforms, and military facilities . Typical applications include power distribution, lighting control, motor control, and temperature maintenance in hazardous areas .

Certifications and Compliance

For Mozambique, it is crucial to select boxes that comply with international standards:

- ATEX (2014/34 EU): Required for equipment in explosive atmospheres in Europe and widely recognized internationally .
- IECEx: Provides global certification for equipment in hazardous zones, ensuring compatibility with international safety standards .
- IP66 Protection: Ensures dust-tight and water-resistant enclosures suitable for harsh industrial environments .
- Flameproof Class IIC: Suitable for highly flammable gases and vapors .
