

Export Huijue Fiber Optic Switch Configuration

Summary of Content

You can export a Huijue fiber optic switch configuration by connecting via SSH, Telnet, or console and transferring the configuration file to a TFTP server for backup or replication.

Preparation

- **TFTP Server Setup:** Install a TFTP server such as Tftpd64 on a PC within the same network as the switch. Ensure the server is running and accessible, and note its IP address (e.g., 192.168.2.2) .
- **PC Network Configuration:** Configure your PC's Ethernet interface to be in the same subnet as the switch. For example, if the switch IP is 192.168.2.110, set your PC to 192.168.2.2 with a /24 subnet mask .
- **Access Tools:** Use an SSH, Telnet, or serial console client such as PuTTY or Tera Term to connect to the switch .

Export Procedure

- **Connect to the Switch:** Open your SSH/Telnet/console session and log in with administrative credentials.
- **Save Current Configuration:** Ensure the current running configuration is saved to the switch's memory using the appropriate command (often write memory or save config) .
- **Export to TFTP:** Use the switch's command to export the configuration file to the TFTP server. The command typically follows the format:
