

Extra-large fiber optic splice package

Overview

2178 Extra-Large Fiber Optic Splice Closure is designed to meet all common needs and field conditions. The unique strength of the member clamp assembly avoids cable sheath movement with temperature changes. In modern Passive Optical Network and FTTx deployments, robust fiber splice closures not only protect fiber optic splices from mechanical stress from mechanical stress, moisture, and environmental hazards, but also support key functions such as branching, mid-span access and capacity expansion. Engineered for fast installation and long-term durability, the FOSC portfolio—including modular solutions with gel-sealed. Architectures for 5G, FTTH, FTTx, Fiber Deep, and Data Centers networks are being built with fiber counts greater than the traditional 864 ribbon cables forcing the need for greater capacity closures and splice trays. Fiber trays that can support high fiber counts are critical in supporting the. AFL offers robust fiber optic splice closures—including Apex® high-density and LightGuard® weathertight and sealed models—for above-ground, aerial, and buried applications.
