

Fiber Fusion Tray Serial Number

Summary of Content

The serial number of a Fiber Fusion Tray is typically located on a label or etched on the tray itself, and can be obtained from the manufacturer or authorized service center if not visible.

Locating the Serial Number

Most fiber fusion splice trays, including models from FS, Corning, Ortronics, and Hubbell, have a serial number printed or etched on the tray or on an attached label. This number is used for tracking, warranty, and support purposes. Common locations include:

- On the underside or back of the tray
- Near the fiber entry points or mounting area
- On a manufacturer label that may include model number and UPC code

Manufacturer Support

If the serial number is not visible or has worn off, you can contact the manufacturer or authorized service center:

- FS: Refer to the datasheet for tray specifications and contact FS support for identification .
- Corning: Customer Care can assist with serial number verification and ordering information .
