

Fiber Optic Cable Information Price

Summary of Content

Fiber optic cable costs range from \$0.09 to \$6 per foot for materials, with total installed costs varying from \$2 to \$50+ per foot depending on type, installation method, and project complexity.

Material Costs

The price of fiber optic cable depends on fiber type, strand count, and construction. Single-mode fiber typically costs \$0.10 to \$0.50 per foot, while multimode fiber ranges from \$0.30 to \$1.00 per foot. Higher strand counts increase costs proportionally; for example, a 12-strand cable may cost around \$0.50 per foot, whereas a 24-strand cable can reach \$1.00 per foot. Specialized cables, such as armored or plenum-rated cables, can cost \$0.50 to \$5 per foot due to enhanced durability and environmental protection. Pre-terminated assemblies, patch cables, and pigtails carry higher costs because of factory termination, with prices influenced by connector type and fiber count. Bulk purchases for wholesale can reduce material costs to \$0.09–\$1.52 per foot, while retail prices typically range from \$1 to \$6 per foot.

Installation Costs

Installation is a major component of total fiber costs. Labor rates vary depending on terrain, access, and complexity:

- Indoor runs: \$1–\$3 per foot for labor, plus \$0.25–\$1.50 per foot for cable.
- Outdoor aerial installation: \$8–\$12 per foot, translating to roughly \$40,000–\$60,000 per mile.
