

# Fiber Optic Cable Junction Box 24 Buried Type

## Overview

GJS-24-D (PLC) 24 Cores SC fiber optic joint closure is a kind of small junction box that is used to join the fiber bundles and protect them during cabling installation, preventing the cables from abrasion and other damage. For protective feature, the fiber optic splice closure is made of PP material, with features of anti-UV, anti-aging and corrosion. This small horizontal fiber splice closure is a compact and durable enclosure designed to protect and manage fiber optic splices in small-scale outdoor deployments, supporting max 24 core splices. With a robust structure and IP65-rated sealing, it ensures reliable fiber joint protection in. The compact FTTH distributor I-CASE FTTH-OUT24 is perfect for connecting buildings with fiber optics and for additional secondary distribution. The compact size and rugged design allow the closure to be applied in below grade, aerial and buried installations. It adopts scientifically formulated engineering plastic.
