

Fiber Optic Cable Relocation Project Quotation

Summary of Content

Fiber optic cable relocation costs vary by deployment method, labor, materials, and permits, typically ranging from \$5 to \$27 per foot depending on underground or aerial installation.

Typical Cost Components for Fiber Relocation

Cost Component	Description	Typical Range (USD)	Notes
Labor	Installation, splicing, and testing	\$4-\$13 per foot	Underground labor is higher; outsourced labor costs more than internal crews
Fiber Cable Material	Single-mode or multi-mode fiber	\$1-\$4 per foot	Cost varies by strand count and fiber type
Conduit / Duct	Protective tubing for underground fiber	\$0.60-\$2.20 per foot	Includes trenching or bore work; costs increase with depth and soil difficulty
Trenching / Bore Work	Excavation for underground deployment	\$14.50-\$26.50 per foot	Plowing is cheaper; trenching is more expensive; aerial deployment reduces this cost by 20-40%
Permits / Right-of-Way	Local regulatory approvals	\$500-\$5,000 per project	Depends on municipality and property access
Splicing / Fusion	Fiber connection points	\$50-\$150 per splice	Required for route changes or reconnections
Testing & Certification	OTDR testing, certification reports	\$0.50-\$1.50 per foot	Ensures signal integrity and compliance
Travel / Crew Logistics	Mobilization and transport	Variable	Longer distances or multiple sites increase labor hours

Notes on Cost Variability

- Deployment Method: Underground relocation is significantly more expensive than aerial due to labor and trenching costs.
