

Fiber Optic Cable Supply Quotation

Summary of Content

Fiber optic cable prices vary widely based on type, strand count, and sourcing model, with bulk orders typically starting at 1,000 meters and costing \$0.09–\$6 per foot depending on specifications.

Current Market Pricing

Fiber optic cable costs depend on type, strand count, and application. Single-mode fiber generally costs \$0.10–\$0.50 per foot, while multimode fiber ranges from \$0.30–\$1.00 per foot. High-count cables, such as 288-strand backbone cables, can reach \$6 per foot. Pre-terminated assemblies and patch cables are more expensive due to factory termination and connector type. Bulk purchases often reduce per-foot costs by 20–40% compared to retail quantities, and underground or armored installations incur higher costs than indoor or aerial runs .

Supplier Options

You can source fiber optic cables through two main models:

- Factory-direct manufacturers (e.g., Corning, Prysmian) typically require 50,000 meters minimum and offer IEC-certified products at lower per-meter costs.
- Authorized distributors stock certified inventory from multiple brands, allowing smaller orders starting at 1,000–2,000 meters, but at slightly higher per-meter prices . A comprehensive list of suppliers is available through platforms like RP Photonics, which lists over 100 global suppliers, including specialized fibers for harsh environments, high-power lasers, and polarization-maintaining applications .
