

Fiber Optic Rack Switches

Overview

Engineered for high-density environments, these switches offer wide bandwidth, advanced security features, and easy scalability, making them ideal for data center solutions, enterprises, and industries such as, transportation, manufacturing, utilities, and automation. GLSUN Rack Mount Optical Switches provide compact, rack-mounted solutions for flexible and reliable optical switching in modern fiber networks. Choose from racks, panels, modules, splice trays, ethernet fiber switches and other structured cabling components. Corning has a variety of hardware solutions including ethernet fiber switches, panels, racks. The SwitchBox® Mechanical Fiber Optic A/B Switch is a device that accepts optical inputs from a primary path and a secondary path to provide manual switching in the event that the primary path signal is broken or otherwise disrupted. Easily switch both transmit and receive fibers to a backup path.
