

Fiber Optic Sensor FS-V22

Overview

The FS-V22 22G/22R (P)/22X are dual digital fiber sensors with a variety of features for precise object detection. This manual provides instructions on installing, connecting, and configuring them. NPN open collector output at 40 V with 20 mA max. and a residual voltage of 1 V max. These sensors are ideal for applications requiring high accuracy and speed, suitable for use in. The FS-V22 22G, FS-V22 22R, FS-V22 22R (P), FS-V22 20R, FS-V22 22X are designed to detect objects. It is capable of both reflective and through-beam operation.
