

Fiber optic cable reel retention

Overview

IEC 61300-2-4:2019 is to ensure that the retention or attachment of the fibre, cord or cable in a fibre optic device or an enclosure. This second edition cancels and replaces the first edition published in 1995. A fiber optic cable retention module includes a housing with a base. A first section extends from the base and defines a pocket for receiving strength members of a fiber optic cable. Any type of damage minimizes or even makes the installation obsolete. The barrel is coated with PE foam. Do you have any questions?

Our quality management system has been ISO 9001-certified since 1997, and our environmental management system has been ISO 14001-certified since 1999. Unlike traditional metal-style reels, MARS is a lightweight, modular system constructed of an. Fiber optic communication systems are becoming prevalent in part because service providers want to deliver high bandwidth communication capabilities (e., data and voice) to customers. Fiber optic communication systems employ a network of fiber optic cables to transmit large volumes of data and. Shop high-quality retractable fiber cable reels from reliable suppliers.
