

Fiber optic terminal box indicator light

Summary of Content

The indicator lights on a fiber optic terminal box (ONT) show the status of power, network connection, data transmission, and alarms, with colors and patterns signaling normal operation or issues.

Common ONT Lights and Their Meanings

1. Power Light

- Green: ONT is powered and functioning normally.
- Red: Power issue or device malfunction.
- Off: No power or severe fault. This is the first light to check when troubleshooting, ensuring the device is receiving electricity ().

2. Optical/Fiber Light

- Green (steady): Fiber connection to the ISP is active and stable.
- Amber/Yellow: Attempting to establish a connection or weak signal.
- Red or Blinking: Connection failure or optical receiver issue.
- Off: No fiber connection detected. This light indicates the status of the fiber-optic link between your home and the service provider ().

3. Data/Ethernet Light

- Green (steady): Data is being transmitted successfully.
- Green (flashing): Internet is in use.
- Amber/Yellow: Slow or intermittent data transmission.
- Red: Data transmission failed.
