

Fiber to the Home Round Box

Overview

STL Home Termination Box (HTB) is a compact fiber wall outlet designed for FTTH (Fiber to the Home) networks. It provides final fiber termination at the customer premises and acts as the interface between the service provider's network and customer equipment. The small enclosure integrates fiber. In this category you will find various options for terminating your fiber optic house connection. We have wall boxes for indoor and outdoor use (also underground), small FTTH wall boxes with 2 or 4 adapters and also connection boxes for flush-mounted and surface-mounted use. The box is designed such that it maintains bend radius control as per G657 requirements, allows for slack storage outside of the wall cavity and provides a maximum storage capacity. It supports especially FTTH networks. It can also be used as a distribution box in.
