

Fire-resistant cable tray supports in West Asia

Summary of Content

Fire-resistant cable trays suitable for West Asia are available from suppliers offering steel, aluminum, and composite trays with fire ratings up to 90 minutes, designed for industrial and high-rise applications.

Key Suppliers and Products

HONGFENG Power Technology offers a wide range of fire-resistant cable trays, including aluminum alloy, stainless steel, and powder-coated options. Their products are certified to ISO, IEC, and CE standards, tested for load, corrosion resistance, and durability, and have been successfully deployed in Middle Eastern oil fields and industrial projects. They provide both standard and custom designs, ensuring compatibility with local project requirements. Zhongli Cable Tray manufactures fire-resistant trays using steel frames coated with fire-resistant paint or composite panels. These trays form a heat-insulating char layer under high temperatures, providing 60–90 minutes of fire resistance, suitable for power plants, chemical plants, and high-rise buildings. Ferrotech supplies FRP (fiberglass-reinforced plastic) cable trays with fire-retardant resins, offering Class 1 fire retardancy according to ASTM E84. These trays are non-conductive, UV-resistant, and corrosion-resistant, making them ideal for harsh environments such as refineries and chemical plants. Flampro provides fire protection coatings and tapes for cable trays, such as FLAMMOTECT-A and DG-CR 0.7, which enhance fire resistance and environmental durability. These solutions are suitable for indoor and outdoor installations, including hospitals, airports, and substations.

Material and Fire Rating Considerations

Article Content

Fire Rated Cable Tray

Cable tray designed to offer continuous support of cables Rated load of 12.5kg per metre over a 1.5m Span 1500mm Trapeze

Electrical Cable Tray Fire Protection

Maintenance Electrical Cable Tray Fire Protection One of the most significant fire protection

Cable Tray Suppliers for Oil & Gas Projects | West Port Middle East

In oil and gas operations, electrical and instrumentation systems require secure, corrosion-resistant, and fire-rated cable support

Fire resistant cable tray | Hermi-solutions

Cable trays are intended for the construction of fire-resistant cable paths with surface cable laying. Cable

Electrical Cable Tray Fire Protection

Electrical Cable Tray Fire Protection One of the most significant fire protection requirements for processing facilities

Fire-Resistant Cable Trays in High-Risk Environments
