

Greece Industrial-Grade Optical Modules

Summary of Content

Greece hosts specialized manufacturers of industrial-grade optical modules, including THEON International and EULAMBIA, serving defense, security, and industrial applications.

Key Greek Manufacturers

THEON International is a leading developer and manufacturer of customizable night vision, thermal imaging, and electro-optical ISR systems. Their two main factories are located in Koropi, Athens, with one facility holding NATO security clearance. THEON's production is vertically integrated, covering design, prototyping, assembly, and testing, ensuring high reliability for military and industrial applications. They specialize in systems that operate in harsh environments, supporting high-speed data transmission and secure optical communications. EULAMBIA is a spin-off from the University of Athens' Optical Communications and Photonics Technologies Laboratory. The company focuses on photonic applications for security and industrial sensing, including Physical Unclonable Function (PUF) devices, optical sensors, and electro-optic modulators. Their products are designed for critical infrastructure, automotive, medical, and industrial automation, offering high accuracy, noise-proof performance, and programmable control for complex industrial systems.
