

High-speed fiber-to-the-home gigabit router

Summary of Content

For optimal home fiber internet performance, Wi-Fi 6 or 7 routers with multi-gig ports and strong coverage are recommended.

Key Features to Look For

- **Wi-Fi Standard:** Wi-Fi 6 (802.11ax) or Wi-Fi 7 (802.11be) ensures maximum speeds and low latency for fiber connections, especially for plans 1 Gbps and higher .
- **Multi-Gig Ports:** Routers with 2.5G or 10G WAN/LAN ports allow full utilization of fiber speeds and support LAN aggregation for faster wired connections .
- **Coverage and Antennas:** Internal or external antennas with beamforming technology help cover large homes (up to 3,500 sq. ft. or more) and maintain stable connections across multiple devices .
- **Device Capacity:** High-performance routers can handle 60-200 devices simultaneously, ideal for smart homes, gaming, and streaming .
- **Security and Management:** Features like WPA3, parental controls, guest networks, and network monitoring enhance security and usability .

Top Router Recommendations

- **NETGEAR Nighthawk RS700S (Wi-Fi 7)**
- Supports multi-gig fiber plans and up to 200 devices
- Tri-band Wi-Fi 7 with speeds up to 1,900 Mbps for gaming and streaming
- Includes NETGEAR Armor for enhanced online security
