

How much does a 1000mm deep fiber optic corrugated pipe cost

Summary of Content

The cost of 1000mm HDPE corrugated pipes for fiber optic applications typically ranges from \$200 to \$500 per meter, depending on material grade, wall strength, and supplier.

Overview

1000mm HDPE corrugated pipes are widely used for fiber optic cable protection, stormwater management, and underground infrastructure due to their durability, flexibility, and high load-bearing capacity. They feature a smooth inner wall for efficient cable installation and a corrugated outer wall for structural integrity, making them suitable for deep burial and high-traffic areas.

Factors Affecting Cost

- **Material and Wall Strength:** Pipes are manufactured in SN4 or SN8 strength classes, with SN8 offering higher load resistance and slightly higher cost.
- **Pipe Type:** Single-wall vs. double-wall corrugated pipes; double-wall pipes with foam cores or reinforced layers are more expensive but provide better crush resistance.
- **Supplier and Region:** Prices vary by manufacturer and distribution channel. B2B wholesale platforms like Alibaba list HDPE 1000mm pipes in the \$200-\$500 per meter range, depending on specifications and order volume.
- **Installation Features:** Pipes designed for fiber optic cable blowing may include low-friction inner surfaces or pre-lubricated cores, which can increase cost.

Additional Considerations
