

How much does a 24-core fiber optic connector cost

Summary of Content

The cost of a 24-core fiber optic cable connector or pre-terminated assembly typically ranges from \$50 to \$200 per connector, depending on type, fiber mode, and construction.

Pricing Overview

The price of a 24-core fiber optic connector depends on several factors:

- **Connector Type:** Common connectors include LC, SC, MPO/MTP, and ST. MPO/MTP connectors are widely used for high-density 24-core cables and are generally more expensive than LC or SC connectors.
- **Fiber Type:** Single-mode (SMF) connectors are usually more costly than multimode (MMF) due to precision requirements and performance over long distances .
- **Pre-Terminated Assemblies:** Factory-terminated cables with connectors installed can cost more than bulk connectors alone, often ranging from \$50 to \$200 per assembly for 24-core configurations .
- **Cable Construction:** Indoor riser-rated, plenum-rated, armored, or outdoor-rated cables influence connector pricing because specialized terminations are required for durability and environmental protection .

Cost Estimates

- **Bulk Connectors Only:** Individual MPO/MTP connectors for 24-core cables can cost approximately \$10-\$30 each, depending on quality and vendor.
