

How much does a distribution box enclosure cost

Summary of Content

The cost of a distribution box enclosure varies widely, typically ranging from \$50 for small residential units to several thousand dollars for industrial-grade or customized enclosures, with installation and additional features influencing the total expense.

Price Range

- Residential enclosures: Small plastic or basic metal units can cost around \$50 to \$200, depending on size and material .
- Commercial and industrial enclosures: Larger, heavy-duty units made from powder-coated steel, stainless steel, or GRP (Glass Reinforced Polyester) can range from \$500 to \$2,000 or more, especially when including high-quality internal components like circuit breakers, surge protectors, and busbars .
- Installation costs: Professional installation for a standard residential setup can add \$1,300 to \$1,800, while complex industrial installations may require weeks of labor and additional permit fees, potentially increasing total costs by 15-20% for retrofits .

Factors Affecting Cost

- Material: ABS plastic, powder-coated steel, stainless steel, or GRP enclosures have different durability and corrosion resistance, with GRP being ideal for outdoor and coastal environments due to its non-corrosive properties .
- Size and capacity: Larger enclosures with higher amperage ratings and more circuits cost more. Walk-in or floor-standing kiosks are significantly more expensive than wall-mounted units .
