

How much does a distribution box protection device cost

Summary of Content

A distribution box protection device, such as a surge protective device (SPD), typically costs between \$50 and \$500, depending on type, capacity, and installation requirements.

Cost Breakdown

Equipment Cost: The price of the protection device itself varies based on brand, technology, and capacity. Basic residential SPDs can start around \$50–\$100, while higher-capacity or commercial-grade devices may range from \$200 to \$500 or more . **Advanced models** may include features like fast response, high flow capacity, and multi-stage protection mechanisms . **Installation Cost:** Professional installation is recommended to ensure proper connection to the distribution box. Installation costs typically include labor and materials, which can add \$50–\$200 depending on complexity and local labor rates . **Maintenance and After-Sales Service:** Some devices include warranties, technical support, and maintenance services. While not always a direct upfront cost, these services can influence the overall investment and long-term reliability .

Factors Affecting Price

- **Type of Device:** Single-phase residential SPDs are cheaper than three-phase commercial or industrial units .
- **Voltage and Amperage Ratings:** Higher voltage or amperage capacity increases cost.
