

How much does a meter of modular cable tray cost

Summary of Content

Modular cable trays typically cost between \$2 and \$50 per meter, depending on material, design, and installation requirements.

Price Range by Material and Type

- **Steel Trays:** Commonly used for general-purpose installations, priced around \$5 to \$25 per meter. Hot-dip galvanized steel is more durable and slightly more expensive than pre-galvanized steel, which is cheaper but less corrosion-resistant .
- **Aluminum Trays:** Lightweight and corrosion-resistant, ideal for outdoor or industrial environments, costing approximately \$6 to \$30 per meter .
- **Stainless Steel Trays:** Highly durable and corrosion-resistant, suitable for harsh or hygienic environments, often the most expensive option, with prices reaching \$30 to \$50 per meter .
- **Fiberglass (FRP) Trays:** Used in aggressive chemical or wet environments, priced \$10 to \$50 per meter depending on specifications .
- **Plastic Trays:** Budget-friendly, generally under \$10 per meter, but not suitable for heavy loads . Tray design also affects cost: ladder trays are more expensive due to their load-bearing capacity, while wire mesh or perforated trays are cheaper and easier to install .
