

How much does it cost to customize a fiber optic coupler

Summary of Content

The cost of a customized fiber optic coupler varies widely depending on specifications, typically ranging from \$50 to several hundred dollars per unit, with exact pricing provided via supplier quotes.

Factors Affecting Cost

- **Coupler Type and Fiber Mode:** Single-mode couplers generally cost more than multimode due to tighter tolerances and lower insertion loss requirements. Dual window couplers or specialized types like TAP or high-power couplers can further increase cost.
- **Split Ratio and Number of Ports:** Custom split ratios (e.g., 10/90, 95/5) or higher port counts (1x4, 1x8) require precise manufacturing, which raises the price.
- **Connectorization:** Couplers can be unconnectorized for splicing or connectorized with LC, SC, FC, or ST connectors. Connectorized units are more expensive due to labor and materials.
- **Packaging and Environmental Requirements:** Ruggedized or weatherproof packaging for outdoor use, or miniaturized designs for space-constrained applications, can add to the cost.
- **Volume and Lead Time:** Ordering in bulk can reduce per-unit cost, while small quantities or rapid turnaround orders may increase it.

Typical Pricing

- **Basic multimode 1x2 or 2x2 couplers:** \$50–\$150 per unit.
