

How much does it cost to install a household electrical distribution box

Summary of Content

Installing a home electrical distribution box typically costs between \$120 and \$6,500, depending on panel type, amperage, labor, and installation complexity.

Basic Installation Costs

For a straightforward installation of a single standard electrical box in an accessible location, homeowners usually pay \$120 to \$260, which includes labor, wiring, and permits for a simple setup . Labor often accounts for the majority of the cost, with electricians charging \$50–\$150 per hour, and a typical job taking 2–3 hours . Standard plastic boxes cost only a few dollars, while metal or weatherproof boxes may range from \$10 to \$30 .

Mid-Range and Upgraded Installations

If the project involves a new or upgraded panel, additional circuits, or difficult access, costs rise significantly. A typical residential panel upgrade, such as a 100–200 amp indoor panel, generally costs \$1,000 to \$2,000, including labor and permits . Adding safety features like AFCI or GFCI protection can add \$150–\$300 per box .

High-End and Complex Projects

For larger or more complex setups, such as 200–400 amp service upgrades, subpanels, or meter relocations, total costs can range from \$3,000 to \$6,500 or more . Factors that drive higher costs include:

- Panel type and amperage
