

How much does it cost to install network cables in a network cabinet

Summary of Content

Installing network cables in a network cabinet typically costs between \$291 and \$4,500, depending on project size, cable type, and labor requirements.

Typical Cost Ranges

The cost of network cable installation varies widely based on the scope of the project. For small-scale installations, such as a single network cabinet with a few runs, prices can start around \$291 to \$349 per wiring run for basic mid-range work in serviceable conditions . For larger or more complex setups, including multiple rooms or high-quality Cat6 cabling, total costs often range from \$1,500 to \$4,500, with an average around \$3,800 . Commercial projects with extensive cabling can exceed \$60,000 depending on the number of cables, type of cable, and labor hours .

Factors Affecting Cost

Several factors influence the final price:

- Cable Type: Cat5e, Cat6, or fiber optic cables vary in cost. Plenum-rated cables for fire safety in commercial buildings are 50-70% more expensive than standard cables .
- Number of Runs: Each cable run adds to labor and material costs. More ports or devices increase the total cost .
- Labor Rates: Technician rates range from \$30 to \$150 per hour, depending on experience and company reliability .
