

How to buy genuine multimode optical cables

Summary of Content

To buy genuine multimode optical cables, choose reputable suppliers, verify cable specifications, and ensure proper certifications like TAA or ISO compliance.

Identify the Right Cable Type

Multimode fiber optic cables come in several types, including OM1, OM2, OM3, OM4, and OM5, with core sizes of 62.5/125 μm or 50/125 μm . The choice depends on your network speed, distance, and application. For example, OM3 and OM4 are optimized for 10 Gigabit Ethernet and data center backbones, while OM1 and OM2 are suitable for shorter distances or legacy systems .

Check Connectors and Configurations

Multimode cables are available in simplex or duplex configurations and with various connectors such as LC, SC, ST, MTRJ, or MPO. Ensure the connectors match your equipment and that the cable is factory-tested for performance .

Verify Authenticity and Quality

- Buy from trusted suppliers like Cables.com, CablesPlusUSA, NewYork Cables, GenuineModules.com, or L-com, which offer certified, high-quality multimode cables .
- Look for TAA compliance, ISO certification, or Made in USA labels for assurance of quality and reliability .
- Check for plenum (OFNP), riser (OFNR), or LSZH jackets depending on installation requirements .
