

How to make cable trays cheaply

Overview

Off-the-shelf cable trays from name-brand makers can be surprisingly pricey. So this build is all about keeping cost down — using only items from the 100-yen / dollar store (Daiso). This article walks through how to DIY a cheap cable tray. Building a custom cable tray is a great way to keep your space organized. Measure your area to determine the tray size, then assemble it by connecting side and end panels securely. Learn measurements, tools, and step by step mounting to boost organization without breaking the bank. However, I find that cable ties bind when you want to remove, replace or add a cable—and, apart from expensive trunking, the other. Light-duty cable trays are designed for applications with moderate cable loads, making them suitable for residential, commercial, and small-scale industrial environments. These trays are typically made from materials such as aluminium or galvanised steel, providing a balance between durability and
