

How to read the serial number of a fiber optic splitter

Summary of Content

The serial number of a fiber optic splitter uniquely identifies the device and can be read directly from the label, often including a combination of letters, numbers, and sometimes prefixes that indicate manufacturer, model, or batch information.

Locating the Serial Number

Fiber optic splitters typically have a label or marking on the enclosure that includes the serial number, model number, and sometimes the manufacturing date. The serial number may be printed directly on the splitter body, on a sticker, or etched into the casing. For example, splitters from major manufacturers may use formats like FO-00001646747-11 or PNP-0000154789-10, where the prefix indicates the product line and the numeric portion is the unique identifier (Corning guidance) .

Understanding the Format

- Prefixes: Some serial numbers start with letters such as FO- or PNP-, which should be included when entering the number into a database.
- Numeric portion: The digits following the prefix are the unique identifier for the splitter.
- Special cases: If a serial number begins with S#, the prefix is typically dropped, and only the numbers after the "#" are used .

Using the Serial Number

Article Content

Fiber Optic Symbols

Fiber optics are flexible cables with dielectric filaments of glass or plastic materials capable of transmitting signals through light

Optical Fiber Splitter Manuals & User Guides

User manuals, setup guides, troubleshooting help, and repair information for Optical Fiber Splitter products.

How to install a fiber optic splitter step-by-step?

Installing a fiber optic splitter involves several crucial steps to ensure proper functionality and reliability. Here's a step

Everything You Need to Know About Fiber Optic Splitter: A Detailed ...

A fiber optic splitter is a passive optical device that divides a single optical signal into multiple outputs. In simple

Finding Brocade product (s) serial numbers

Description: This article will discuss how to locate and find the correct Serial Number of a FOS switch or director via

Fiber optic cable color coding explained

The color on each fiber and tube is what keeps you on the right one, but the scheme changes from country to country

How to identify port in fiber optic internet connection

If you have a fiber optic internet connection at home, you must be wondering where to plug in your devices to get the

The FOA Reference For Fiber Optics

The text on the cable starts with the Corning product name "Corning Rocket Ribbon (TM) Optical Cable," date of manufacture

Fiber Optic Splicing: A Complete Guide | Jonard Tools

In the ever-evolving world of high-speed connectivity, fiber optic technology serves as the

"Reading" A Fiber Optic Cable

While walking down the street near the Fiber Optic Association's office recently, we found a

The FOA Reference For Fiber Optics

The Metric System Fiber Optics, as an international technology, utilizes the metric system as the standard form of measurement.

What is Fiber Optic Splitter and Types

This post provides a introduction to fiber optic splitters, their types, functions, and several popular Gcabling optical

How to Test the Loss of Optical Splitter?

Optical splitter loss refers to the decrease in optical power that happens when a single

Serial Number Verification

That would be your best idea because when I look at the serial numbers above they *look* legitimate, but that doesn't mean that they

Fiber Optic Cable Color Codes

Fiber Optic Cable And Connector Color Codes Color codes are used in fiber optics to identify fibers, cables

Optical Splitters Demystified: The Silent Heroes Powering Your FTTH ...

An Optical Splitter, also known as a beam splitter, is a passive optical device that divides a single input optical signal

Fiber Optic Splitter: How It Works & Types Guide

This guide demystifies fiber optic splitters, explaining their design, operating principles,
