

How to set up BIM cable tray elbows

Overview

Place tray cable in your model to design an electrical power system. This video demonstrates the following: Set an offset and define the tray path to place cable. Draw vertical cable. In need to create an elbow that starts at a right angle and that has the ability adopt the angle of the routing of the cable tray. I have attached a few pictures with examples. Your assistance. The creation of cable tray elements is equally simple, making use of the static Create method on the CableTray class. Document, a second generation API automatically generated. Here is the simple solution Create two type : 90 elbow and 45 elbow In the real world, to make a 45 elbow, we need two segments, to make a 90 elbow, we need three segments I've also tried to use some geometry forms in revit but no hope. Change a Tee to a Cross for Cable Tray To upgrade a tee to a cross, you must first add. This lesson walks through how to start a project and properly set up for Electrical Cable Tray design in Revit 2025. This Revit tutorial walks through setting up cable tray in revit mep, covering essential tools and techniques for your projects. Welcome back to the CAD Teacher VDCI video course content for the BIM 321 course, Introduction to Revit MEP.
