

How to set up a 50M fiber optic router

Summary of Content

To set up a 50M fiber optic router, connect the fiber line to an ONT, link the ONT to your router via Ethernet, configure the router with ISP credentials, and optimize Wi-Fi and security settings.

Step 1: Gather Equipment

Ensure you have the following:

- Optical Network Terminal (ONT) provided by your ISP to convert fiber signals into data your devices can use .
- Router compatible with fiber input (check for WAN or SFP ports), .
- Fiber optic cable (usually SC/APC or SC/UPC connectors).
- Ethernet cable to connect the ONT to the router .
- Power adapters for both ONT and router.

Step 2: Install the ONT

- Locate the fiber wall outlet where the ISP's fiber line enters your home .
- Connect the fiber optic cable from the wall outlet to the ONT's designated port.
- Power on the ONT and wait 2-5 minutes for the status lights to stabilize .

Step 3: Connect the Router

- Use an Ethernet cable to connect the ONT's LAN/Ethernet port to the router's WAN port .
