

How to terminate the optical cable of an outdoor base station

Overview

Thus, a fiber termination box is used to terminate the optical fiber cables in the field and connect them to the pigtail by splicing. Then, the optical cable core and pigtail are. Knowing how to terminate fiber optic cable is one of those skills that separates a clean, reliable network installation from one that causes headaches for years. Whether you're connecting runs to patch panels, linking switches between floors, or extending fiber to a new building on your property. This guide provides a comprehensive overview of fiber optic cable termination methods, including fusion splicing and mechanical termination. This involves either installing a connector or creating a splice to establish a reliable connection point for the optical signal.
