

How to use Huijue access switches

Summary of Content

Using Huijue access switches involves physical setup, IP and VLAN configuration, port assignment, and optional security and QoS settings to ensure efficient network connectivity.

Physical Setup

- Mount the switch in a suitable rack or location with proper ventilation.
- Connect power and verify the switch powers on.
- Connect end devices (PCs, printers) to the switch ports using Ethernet cables.
- Optional uplinks: Connect other switches or routers to designated uplink ports for network expansion .

Initial Configuration

- Access the switch interface via a console cable, SSH, or web GUI.
- Assign an IP address to the switch for management purposes. This allows remote administration .
- Set the default gateway to enable communication with devices outside the local network .

VLAN and Port Configuration

- Determine VLAN requirements for your network to separate traffic logically.
- Create VLANs using the CLI or web interface. For example, in CLI:
