

# How to use a fiber optic box without a router

## Overview

If your ISP doesn't require a technician to set up your connection, these are the steps to self-install fiber internet: Locate your fiber network terminal. Connect the fiber terminal to the network box. Connect your device to the network. Before switching to fiber optic technology, it's likely that you had a modem and router in your home. These devices gave you an Internet connection and Wi-Fi. The ONT: Receives optical signals from the ISP's fiber infrastructure. Set up your home Wi-Fi. Some ISP's use ONT's that have integrated routers - its easier for THEM but it gives them more control over your network. In contrast, fiber. In this video, I show you how to use your own router with AT&T Fiber and completely remove the gateway! In this video, I show you how to use your own router with AT&T Fiber and completely remove the gateway! This setup lets you plug fiber directly into your router using an SFP+ ONT and bypass the.
