

How to use galvanized mesh cable tray clips

Overview

Learn how to cut, bend, and assemble mesh cable trays to create T-branches, cross-overs, 90° bends, and rising or falling bends. In this step-by-step tutorial, we demonstrate practical installation techniques using clamps and simple cutting methods for clean, secure cable. Cablofil, the inventor of wire mesh cable tray, is a revolutionary cable management system that provides exceptional strength combined with flexibility to adapt easily to field requirements. Here's the technical framework engineers and specifiers actually need. more Specifying the wrong cable tray clip doesn't collapse a tray — CABLOFIL is only designed to support cables. Under no circumstances should it be used as a walkway. While many Legrand/Cablofil supports utilized our Fast Assembly System (FAS) which offer simple one-step locking tabs that require no additional hardware to secure WMCT to supports, our WMCT have. Galvanised saddles and clips are essential to securing and managing cables and containment systems. Installation is easier since wire mesh requires fewer parts and the FAS system.
