

India Fiber Optic Communication

Summary of Content

India's fiber optics communication sector is rapidly expanding, driven by government initiatives, technological innovation, and growing demand for high-speed, low-latency connectivity.

Market Growth and Adoption

India's fiber optics market reached USD 517.2 million in 2025 and is projected to grow to USD 1,195.7 million by 2034, reflecting a CAGR of 9.76% from 2026 to 2034 . This growth is fueled by the rollout of 5G networks, expansion of data centers, AI workloads, and digital inclusion initiatives. Both urban and rural areas are seeing increased fiber deployment, with programs like BharatNet Phase III and PM GatiShakti enhancing broadband access in gram panchayats and key economic corridors .

Infrastructure and Connectivity

As of September 2025, India's optical fiber cable (OFC) length reached 42.36 lakh route km, nearly doubling from 19.35 lakh route km in 2019 . This expansion supports high-speed internet, low-latency applications, and smart city infrastructure. The median fixed broadband download speed increased to 60.34 Mbps, reflecting improvements in network performance . Government policies under the Telecommunications Act, 2023 and initiatives like Sanchar Saathi have strengthened the telecom ecosystem, promoting technological self-reliance and security .
