

Indonesia Vertical Shaft Cable Tray Specifications

Overview

Cut to site-specific widths from 100 to 900 millimetres, fabricated to SNI and NEMA VE-1, finished hot-dip galvanised or Jotun powder-coated to match the corrosion class of the room. Every order is cut to specification. Cable management spec covered: NEMA VE 1 Class 8B cable tray (420 kg / 2,400 mm span, Sucofindo report E26933/FNBPAS) and Class 8C cable ladder (1,340 kg / 2,400 mm span, Sucofindo report E26929/FNBPAS, 18 July 2025) — manufactured at PT Metalindo Tosan Surya's Tangerang factory. If you are writing. Need cable tray for a project?

The workhorse of modern Indonesian construction — a ventilated, return-flanged steel tray that supports a building's power, data, and services runs from the service void out. Continuous Support: Prevents sagging in small diameter cables. Physical Shielding: Offers better protection against falling objects or dust. Conduit pipes protect cables from damage, moisture, and external interference.
