

Installation of fiber optic junction boxes without jumpers

Summary of Content

You can install a fiber optic junction box without jumpers by carefully splicing the incoming fiber directly to the internal distribution fibers, ensuring proper routing, protection, and testing.

Preparation and Tools

Before starting, gather the necessary tools and materials:

- Fiber optic junction box
- Fiber cleaver and stripper
- Fusion splicer or mechanical splices
- Cable ties and protective grommets
- Cleaning wipes and isopropyl alcohol
- Mounting screws and drill Choose a location close to the fiber entry point, avoiding direct sunlight or moisture, and ensure accessibility for future maintenance .

Installation Steps

- Mount the Junction Box Mark the drill holes using a level, drill, insert dowels, and secure the box with screws .
