

Intelligent handheld fiber optic light source for local area networks

Overview

This handheld adjustable light source offers quick and accurate testing and provides 1-4 output wavelength options for single and multi-mode fiber. It is designed for the installation and maintenance of optical fiber networks. VIAVI light sources offer versatility in measuring fiber optic light continuity, loss and quality in field.

SmartClass™ Fiber OLS-85 handheld light source is a professional, versatile, and compact instrument used for fiber-optic network qualification and certification. Its specific wavelength combinations make it optimal for link loss testing and long-haul, metro, and access telecommunication. The KI 2400 Series Zero Warm-up Light Source uses an advanced optical stabilization method which avoids the usual laser package-warm up and thermal power drift limitations, to offer ultra high stability, insensitivity to variations in ambient temperature or ORL, and zero warm up time.
