

Italian Steel Cable Tray Specifications

Summary of Content

Italian steel cable trays are available in stainless steel, galvanized steel, and wire-mesh types, with ladder, perforated, closed, and mesh designs, compliant with European and international standards.

Materials and Types

Italian manufacturers such as Schiavetti Tekno and FEMI-CZ produce cable trays in stainless steel, galvanized steel, and wire-mesh. The main types include:

- Ladder trays: Suitable for medium to large section cables, offering high load capacity and excellent ventilation.
- Perforated trays: Lightweight with good cable ventilation, ideal for general industrial use.
- Closed-bottom trays: Provide full cable protection, suitable for environments requiring cable isolation.
- Wire-mesh trays: Flexible, lightweight, and easy to install, often used in large plants or complex layouts .

Dimensions and Customization

Standard widths include 300 mm trays, but manufacturers offer custom sizes to fit specific project requirements. FEMI-CZ and Schiavetti Tekno provide tailored solutions for large plants, energy, transport, and oil & gas sectors, ensuring compatibility with systems like Unistrut .
