

Jxf Protective Distribution Box

Overview

It is used in the AC 50Hz power, lighting and circuit systems with the voltage of 500V and below for power distribution control, monitoring and metering protection, mainly suitable for many places such as industrial and civil buildings, industrial and mining enterprises . It is used in the AC 50Hz power, lighting and circuit systems with the voltage of 500V and below for power distribution control, monitoring and metering protection, mainly suitable for many places such as industrial and civil buildings, industrial and mining enterprises . JXF Series Power Distribution Box product is box assembled with various control functions by customer-selected components, and there are many box sizes and specifications and the size of the box can be customized according to the size of the installation elements. It is used in the AC 50Hz power. JXF distribution box The JXF distribution box is suitable for three-phase three-wire, three-phase four-wire, and three-phase five-wire systems with a frequency of 50 Hz and a voltage of 500 V or less, and a load current not exceeding 250 A. Engineered to safely handle operating voltages of 220V or 380V, this robust cabinet guarantees reliable performance for. Note: The indoor concealed box can be customized. To order such indoor box, a letter "R" is specified when ordering; to order the concealed box sized 250 x 200 x 140, the order number is JXF252014R.
