

Latvia makes construction site electrical distribution boxes

Summary of Content

Latvia has specialized manufacturers and suppliers of construction site electrical distribution boxes, including SIA ELDI and Satema Baltic SIA, offering high-quality, portable, and certified solutions.

Key Latvian Companies

SIA ELDI is a Latvian company with over 20 years of experience in industrial electrical systems. They focus on electrical distribution systems and automation, providing customized solutions for construction and industrial projects. ELDI collaborates closely with SIA LVDE for electroassembling, ensuring a full range of services from design to production and installation, supported by a highly qualified team of designers, electricians, and project managers. Satema Baltic SIA specializes in portable electrical distribution equipment for construction sites. Their product range includes mobile transformers, aluminum electrical distribution enclosures, socket blocks, and other transportable electrical installations. Satema Baltic meets ISO 9001 quality standards and is registered with TransQ, Sellihca, and Startbank, ensuring compliance with international quality and safety requirements. They also provide innovative and environmentally friendly floodlight masts for construction sites.

Product Features

- **Portable and durable enclosures:** Designed for outdoor and construction site use, often made from aluminum for lightweight and corrosion resistance.
- **Integrated safety devices:** Circuit breakers, fuses, and grounding bars to prevent overloads and electrical faults.
