

Layer 2 Managed Core Switch

Overview

This is the next generation of modular Gigabit and Multigigabit Ethernet switches. The series provides enterprise-class Layer 2 and 3 switching, is designed for DNA Center and SD-Access management and automation, and includes an Enhanced Limited Lifetime Warranty (E-LLW). The solution provides the great control and flexibility for network management with its Layer 2, Layer 3, Management & Monitoring, QoS, and Security features with flexibility of network management. We offer toughened, industry-specific products with multiple industry certifications, such as parts of the EN 50155 standard for rail applications, IEC. Choose Cisco Meraki cloud-managed network switching for continuous network performance at scale without complexity. As the use of industrial Ethernet devices increases, network security, segment isolation, and packet priority. ECS4120-28Fv2 is a high-performance Gigabit Ethernet switch featuring 28 ports, with 20 x GE (Support DDM) SFP+ 4CG + 4 10G SFP+ ports.
