

Lb series distribution boxes

Summary of Content

LB series distribution boxes are electrical enclosures designed for safe, practical, and organized power distribution with good insulation and impact resistance.

Overview

LB series distribution boxes are used to house electrical circuits and components, providing a centralized point for power distribution in residential, commercial, or industrial settings. They are designed to be safe, practical, and easy to install, with features that enhance both usability and protection .

Key Features

- **Safety and Insulation:** LB series boxes offer strong insulation properties to prevent electrical hazards and ensure safe operation .
- **Impact Resistance:** The enclosures are built to withstand physical impacts, protecting internal wiring and components .
- **Ergonomic Design:** Some models include spring-loaded panels that can be easily opened by pressing a button, facilitating quick access for wiring and maintenance .
- **Complete Inner Wiring Setup:** The boxes come with pre-arranged inner compartments for wiring, making installation straightforward and reducing setup time .

Applications

LB series distribution boxes are suitable for:

- Residential buildings for circuit protection and power distribution.
