

Lebanese Standard Cable Tray

Summary of Content

Lebanese standard cable trays are available in ladder, wiremesh, and solid designs, manufactured to meet both local and international standards for safe and efficient cable management.

Types and Materials

In Lebanon, cable trays are offered in several types to suit different installation needs:

- **Ladder Trays:** Ideal for heavy-duty cables and long spans, providing strong support and easy access for maintenance.
- **Wiremesh Trays:** Flexible and lightweight, allowing excellent ventilation, minimal dust retention, and easy visual inspection of cables. Legrand's Cablofil wiremesh trays are a leading example, featuring a 90% open structure and quick-fix systems for bends and direction changes .
- **Solid or Trough Trays:** Used where full protection of cables is required, often in industrial or outdoor environments. Materials commonly used include pre-galvanized steel, hot-dip galvanized steel, stainless steel (304L, 316L), and aluminum, ensuring durability and corrosion resistance for various environments .

Standards and Compliance

Lebanese cable trays comply with local and international standards, ensuring safety and reliability:

- **Fabrication and finish standards:** BS EN 61537:2007, BS 5750, BS EN 10130, BS EN 10131, BS EN 10051, and NEMA standards .
