

Light-sensing touch module

Overview

A touch sensitive LED module combines light output with user interaction through capacitive touch detection, eliminating the need for mechanical buttons. These compact units are ideal for modern lighting systems, smart devices, and creative installations where sleek design and. 3 Way Touch Sensor dimmer, Touch lamp Repair kit Control Module, Replacement Sensor, Touch Switch, 150Watt. 20PCS TTP223 Capacitive Touch Switch Button Sensor Module Self Locking for Arduino. Our maXTouch ® touchscreen controllers use unique and patented sensing algorithms for robust and reliable touch operation in the most challenging environments. With excellent immunity to water and electromagnetic noise and the ability to detect touch through thick gloves or front panels, these. Discover capacitive touch sensor module with LED for precise lighting control. Features dimming function, CE ROHS certified, ideal for cabinets and closets. The Ring Touch Sensor Module with LED is a versatile touch-sensitive module designed for various applications requiring touch-based control. This module is suitable for a wide range of materials including wood, plexiglass, acrylic, resin, stone, plastic, and cardboard.
